About MDEC

Malaysia Digital Economy Corporation (MDEC), a government agency under the purview of the Ministry of Digital, was established in 1996 to lead Malaysia's digital economy. Beginning with the implementation of the MSC Malaysia initiative, we have since then catalysed digital transformation and growth all over the nation. By offering greater incentives and governance for growth and re-investment, we aspire to bolster Malaysia's status as the digital hub of ASEAN, opening new doors and driving shared prosperity for all Malaysians.

1. LinkedIn Talent Insight (LTI)

Information was extracted from LinkedIn Talent Insights on 30 September 2024 using filtering of 1,291 digital tech and services related roles identified all industries in Malaysia and the Region. The term 'digital talent' used in this document is defined as talents currently employed and having an active LinkedIn profile, hence, may not be fully reflective on the entire talent ecosystem.

2. MDEC Research

MDEC research and tracking of digital job vacancies across 5 job portals – LinkedIn, JobStreet, MauKerja, MYFutureJobs and Foundit (previously known as Monster); Limitations to the availability of data filters that is accessible publicly on their respective job portals; Extraction as of 30 September 2024

3. PIKOM - Economic and Digital Jobs Market Outlook, 2023

The "Economic and Digital Jobs Market Outlook, 2023" by PIKOM analyzes Malaysia's digital job market, predicting economic growth and significant salary increases in 2023 and 2024, while comparing Malaysia's digital salaries with those in other countries. The data is based on sources like Jobstreet and SalaryExpert, along with PIKOM's estimates.

4. MyDIGITAL Corp - What Gig Workers Really Want, May 2024

This paper delves into the world of gig workers in Malaysia. Through a survey of 1,500 gig workers, this paper explores the intricate balance gig workers strike between the allure of flexibility and the greater income variability of gig work from the lens of the workers.

Digital Talent Landscape, 3rd Quarter 2024

- 3 Education and Utilities emerge as competitive industries for managerial roles, emphasizing Malaysia's focus on sustainable development and digital literacy.

The Landscape of Gig Workers in Malaysia

In Malaysia, the gig economy is considered a subset of the non-standard/informal sector, which is characterised by its largely flexible employment, with workers holding the power and freedom of choosing when, where, and how many hours they would like to work.

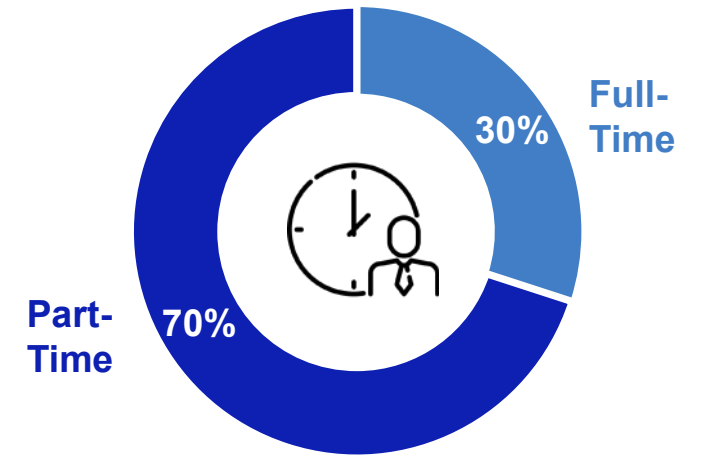

Location-based Gig Workers

- Perform tasks at specific physical locations, enabled by digital labour platforms
- Ride hailing, delivery, home services (e.g. cleaning, plumbing or electrician)
- Task-based work (e.g. running errands or performing specific tasks for others in platforms like GoGet)

Non-location-based Gig Workers

- Perform tasks or work assignments online, remotely or in-person, with or without utilising digital labour platforms
- Freelancing (e.g. graphic design, writing, programming or other contract-based jobs)
- Tutoring, coaching and online content creation.

*Survey respondents: 1,500 gig workers

MOHE-MDEC Global Outsourcing Talent (GOT) Programme (1/2)

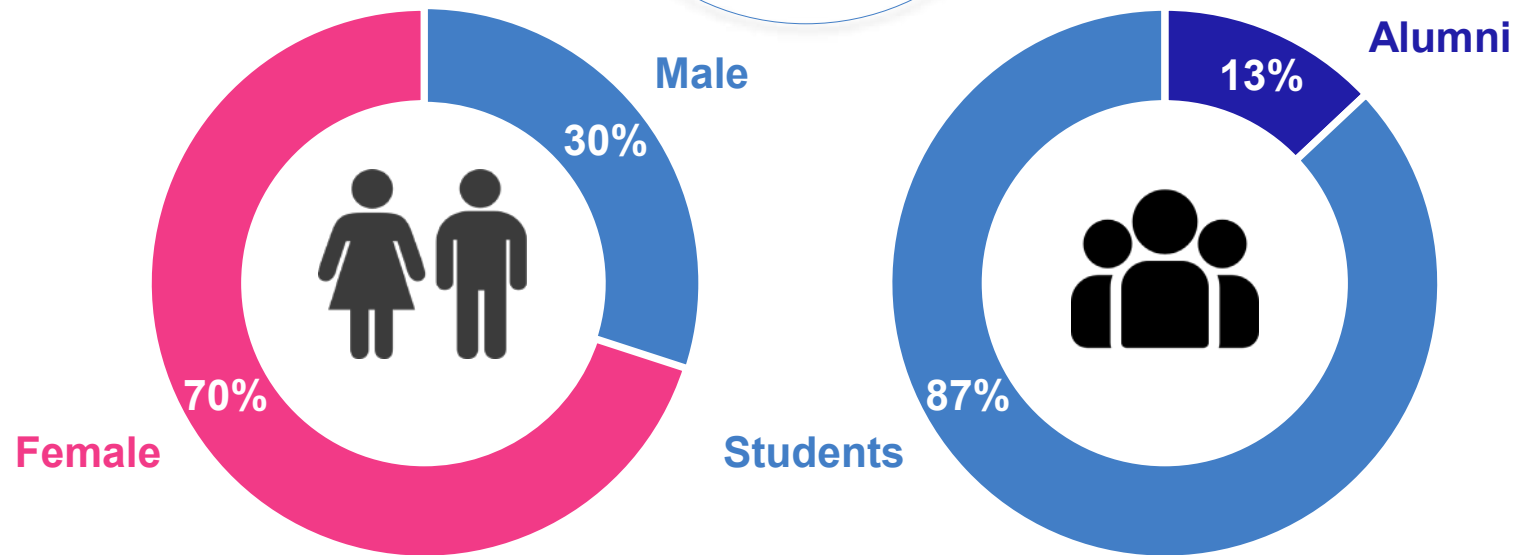

MOHE-MDEC GOT programme offers a 3-month intensive training to equip participants with the skills to become competitive digital freelancers (sharing / gig economy model).

The primary objective is to empower local talent in the freelancing world, enabling them to secure international jobs on digital platforms and earn a sustainable income.

Total Participants

5,518

2023 - 2024

MOHE-MDEC Global Outsourcing Talent (GOT) Programme (2/2)

Workstream	No. of Participants	Average Income Earned
Creative Media 	1,369	RM 3,571
Social Media Manager 	1,166	RM 7,272
Virtual Assistant 	1,152	RM 1,671
Linguistic & Writing 	918	RM 2,485
IT & Web Development 	913	RM 2,608

Creative Media workstream which attracts the most participants (**1,369**) reflects its broad appeal driven by versatility and the rising demand for creative content. While **Social Media Manager** workstream with the highest average income of **RM 7,272** indicates that participants in this field are handling advanced tasks or serving lucrative markets.

Notes: Income as declared by the participant
